

Augmented Reality in Pharmaceutical Processing - Optimization of Set-up and Line Clearance -

Sebastien Gonzalez

Vifor Pharma, Fribourg production site
sebastien.gonzalez@viforpharma.com

Vifor Pharma implemented various projects in the frame of the Industry 4.0 transformation. As a relevant example, the Augmented Reality was implemented on a packaging line to optimize the Set-up and the Line clearance processes in a pharmaceutical environment. This presentation shows the path forward until the implementation on the technology, the human factor and the outcomes.
